

PULSE INTELLIGENCE LABS

THE HUMAN PERFORMANCE COMPANY

We build AI systems that measure and train human performance. **Pulse Check** is our **flagship platform for college athletics**.

PRE-SEED

\$1.4M

\$10M pre-money

FOUNDER

Tremaine Grant

Founder & CEO

PRODUCT

Mental performance OS

DETECT → TRAIN → ROUTE → MEASURE

● THE PROBLEM

Pressure gets seen **too late.**

Athlete pressure rises before any support system responds.

4x

CRISIS RISK

more likely to face a mental health crisis.

60%

COMPETITION ANXIETY

of athletes experience anxiety leading up to competition.

10%

COACH VISIBILITY

reach out to a coach before crisis hits.

Mental health support is now **required.**

The NCAA mandates that every member school provide student-athlete mental health support. Pulse Check is how schools meet it.

● **2022**

NCAA Constitution requires mental health access for every member school.

● **Aug 2024**

Best Practices became legislatively effective across all divisions.

● **Nov 2025**

First Division I attestation deadline. Compliance is now reported.

THE 4 REQUIRED COMPETENCIES

Healthy environment

Screening for distress

Action plans

Care from licensed providers

Pulse Check delivers all four.

● WHY THIS IS DIFFERENT

Not a vitamin. A **prescription**.

Most performance tools are optional upgrades. Compliance makes Pulse Check a line item schools already have to fund.

THE OLD WAY

A vitamin

- ✗ Nice to have, easy to cut
- ✗ Sold on motivation
- ✗ Competes for discretionary budget

PULSE CHECK

A prescription

- ✓ Required, already in the budget
- ✓ Sold on compliance
- ✓ Funded as a mandate line item

Train the mind **before the moment.**

Pulse Check builds composure ahead of competition, supports the athlete in the moment, and routes to real care when needed.

TRAIN

Athletes chat with Nora, their AI coach, through a personalized curriculum of cognitive simulations on their phones, rehearsing composure, focus, and decisioning before they reach competition

SUPPORT

On game day, passive **biometrics catch the signal early** and Nora reinforces the trained skills in real time.

ROUTE

When Nora **detects symptoms of a mental crisis brewing**, Pulse Check **connects the athlete to a human clinician through AuntEDNA.ai's** HIPAA-compliant clinical pathway.

Athletes train the response before competition, so the body remembers how to perform under pressure.

● HOW IT WORKS

What the athlete **actually** sees.

Passive biometrics detect the signal, Nora trains and settles the response, and Sports Intel reads each athlete in context — inside the app they already open.

Passive biometrics read each athlete in context.

Guided box-breathing trains the body to settle.

In the moment, Nora settles the trained response.

Not a chatbot. **A real human.**

We catch the moment, package the context, and hand off to a licensed human through AuntEDNA.ai — including a same-day welfare check.

NORA FLAGS IT

1

Trigger

Flagged chat + biometric snapshot the instant Nora detects a critical signal.

2

Route

The signal layer packages the full context and hands off to AuntEDNA.ai over a HIPAA-secure pathway.

3

Human

A licensed clinician runs a same-day welfare check — a real person, not a bot.

A HUMAN ANSWERS

The difference: chatbot “therapy” stops at the AI. Pulse Check never pretends to be the clinician — it routes to one, with the context already packaged.

The Sports Intelligence Layer.

Competitors own one slice. Pulse Check ties the whole workflow into one institutional system.

Athlete biometrics

Sport-specific signal, not a generic wellness score.

Cognitive game library

Proprietary sims that **train focus, composure, decisioning**.

Clinical partner routing

A real **care pathway through AuntEDNA.ai**.

Institutional workflow

Built for how athletic departments actually **buy and run**.

● PROOF IN MOTION

Three paid pilots, on real campuses.

NAKYALA · CLARK ATLANTA

Three approved paid pilots — **Clark Atlanta, DePaul, and UMES. Worcester State** and the **New England Patriots** are in active conversation.

3

approved paid pilots

\$355

per athlete · first 90 days

\$229

per athlete · annual continuation

Why it matters. Three approved pilots prove the product, compliance, and commercial story at once.

We start where compliance is **mandatory**.

Every NCAA school is a required buyer. We land schools first, then expand to the pro and federation tiers.

PRIMARY FOCUS · NCAA INSTITUTIONS

1,100+

NCAA member schools

520K+

student-athletes

100%

require mental health support

LATER EXPANSION

Professional teams

After NCAA proof

Federations & NGBs

National team pipelines

Leagues

League-wide deals

A clear path into every athletic department.

Pilots are paid contracts. We conform the platform to each school, then convert to a continuation contract.

1

Paid pilot

\$355 per athlete for the first 90-day pilot.

2

Conform

Tune Pulse Check to the school's sport and workflow.

3

Prove

90 days of adherence and compliance evidence.

4

Convert

\$229 per athlete annually, department-wide.

Three approved pilots — Clark Atlanta, DePaul, and UMES — with Worcester State and the New England Patriots in conversation.

The units that compound.

Average annual contract value across the NCAA buyer tiers, with pro and federation deals above.

TIER 1	TIER 2	TIER 3	TIER 4	TIER 5
D2 / D3	Mid-Major	Power Four	Pro Team	Federation
\$5–10K	\$10–20K	\$40–80K	\$100K	\$100–250K
Fastest close, highest volume	~350–450 athletes	~600–700 athletes	Roster + practice squad	Scales with athlete pool

NCAA schools are the beachhead. Pro and federation tiers carry the path to scale.

The first **\$1M** is already visible.

Our 12–24 month beachhead is the set of collegiate contracts already in motion, all required buyers.

D2 / D3

30 × \$10K

\$300K

SEGMENT TOTAL

Mid-Major

20 × \$20K

\$400K

SEGMENT TOTAL

Power Four

4 × \$75K

\$300K

SEGMENT TOTAL

54 CONTRACTS · 12–24 MONTH BEACHHEAD

\$1.0M

A visible path to **\$100M ARR.**

Prove Pulse Check in every NCAA tier in Years 1–2, then scale through pro, federation, and league deals.

YEARS 1–2 · PROVE IT

~\$1.0M ARR

Land anchor contracts across every NCAA tier. Validate the product, build case studies, establish compliance credibility.

54 contracts

YEARS 3–5 · SCALE

\$100M+ ARR

Saturate the NCAA (~1,000 schools, ~\$15M ARR), then layer the high-ACV tiers — ~150 pro teams, ~80 federations, and league-wide platform deals — to clear \$100M+.

**NCAA ~\$15M · pro + federation +
league ~\$85M**

● THE TEAM

Operators who know **software, athletes, and clinical trust.**

Tremaine Grant

FOUNDER & CEO

Principal full-stack engineer, deep in AI, with a decade in clinical research. D1 athlete at FSU.

Bobby Nweke

CHIEF OF STAFF

10 years in human performance across training, athletics, and education.

Lola Oluwaladun

HEAD OF DESIGN

Owns product experience and athlete-facing UX across Pulse.

ADVISORS & BACKING

Marques Zak
CMO, ACC

Valerie Alexander
Enterprise & IPO Attorney

DeRay Mckesson
Organizing · HBCU reach

Erik Edwards
Partner, Cooley

Lead investor — **LAUNCH** ▲

AuntEDNA.ai validates the **care layer**.

Pulse Check owns the detection, scoring, and routing. AuntEDNA.ai handles the clinical handoff.

AUNTEDNA.AI CO-CEOS

Jelanna Salas Olivera

Co-CEO

Dr. Tracey Hathaway

Co-CEO

NSF Phase I grant

Independent validation through scientific peer review.

80% adherence

AuntEDNA.ai evidence across 1,000+ student-athletes.

Shared research layer

Models trained on a validated, peer-reviewed athlete dataset.

WHO SUPPORTS US

We are not building **in isolation.**

Strategic support already spans **clinical pathway, hardware, legal, capital, institutional access, infrastructure, and research.**

CLINICAL PATHWAY

AuntEDNA.ai

Strategic clinical pathway partner for escalation and care routing.

NETWORK WE REACH THROUGH THIS PARTNERSHIP

NCAA® College athletics ecosystem access

NSF Scientific research network

HARDWARE

POLAR

Wearable hardware partner for biometric and recovery signals.

CONFERENCE
