

PULSE INTELLIGENCE LABS, INC.
EQUITY RESERVE APPROVAL
WRITTEN CONSENT OF THE SOLE DIRECTOR AND SOLE STOCKHOLDER

Document date: September 23, 2026

Tremaine Grant, constituting the sole director and sole holder of the Company's outstanding voting Common Stock, adopts the following resolutions in those respective capacities under Sections 141(f) and 228 of the Delaware General Corporation Law. This consent is executed after completion of the Company's Founder Share Surrender and Retirement Agreement. Its actual execution and delivery date, recorded with the electronic signature, is the "Approval Date."

1. FOUNDER RETURN AND CAPITALIZATION DETERMINATION

The undersigned confirms the completed surrender and retirement of 1,000,000 Common shares under the separately signed Founder Share Surrender and Retirement Agreement and the corresponding stock-ledger entry. The Founder consequently holds 8,000,000 issued and outstanding Common shares. The returned shares have resumed authorized and unissued status. The Certificate of Incorporation filed December 11, 2025, Delaware File Number 10434585, authorizes 10,000,000 Common shares at \$0.00001 par value per share.

The Board approves the following authorized-share allocation and reservation schedule on the Approval Date:

Issued and outstanding Founder Common Stock: 8,000,000 shares.

Aggregate Equity Incentive Plan reserve: 1,600,000 shares.

Separate EDNA strategic reserve: 400,000 shares.

Total issued shares and reserved authorized shares: 10,000,000 shares.

Unallocated authorized shares outside these reserves: zero.

Reserved shares remain unissued until lawfully issued under their governing instruments. The 1,600,000-share Plan reserve includes existing awards and commitments under the Plan's share-counting rules; it is not added on top of them. The schedule preserves 25,000-option allocations each for Valerie Alexander and Marques Zak and identifies 500,000 shares as a proposed Chris Collins allocation, subject to its separate grant and class approvals. On that planning basis, 1,050,000 Plan shares remain unallocated. This consent itself grants none of those individual awards.

2. BOARD ADOPTION AND STOCKHOLDER APPROVAL OF PLAN AMENDMENT

The Board hereby adopts, and the sole stockholder separately approves, the Proposed Amendment to the Equity Incentive Plan prepared September 14, 2026 and attached as the Plan Amendment. The approval includes replacement of Plan Section 3.1 with the 1,600,000-share aggregate limit and addition of Section 3.5 concerning the separate strategic-partner reserve. The original Plan's remaining provisions, eligibility restrictions, share-counting rules and protections for outstanding awards remain unchanged. This approval includes the stockholder approval required by the Plan for the reserve amendment and, to the extent applicable, its incentive-stock-option provisions.

3. SEPARATE STRATEGIC RESERVE

The Board separately reserves 400,000 authorized and unissued Common shares outside the Plan: 200,000 for EDNA, Inc.'s Strategic Share Award and 200,000 for its additional Strategic Partnership Warrant. These shares are counted once, exclusively within this strategic reserve. This reservation supports the separate EDNA Board Consent and definitive instruments. Issuance remains subject to their own signatures, consideration approvals, reciprocal-delivery conditions and existing investor rights. No EDNA shares are issued by this reserve consent, and EDNA is not made a Plan participant.

4. LAUNCH NOTE AND FUTURE SHARE CAPACITY

The Company's \$25,000 LAUNCH convertible promissory note is accounted for separately from the authorized-share allocation above. Its conversion rights, accrued interest, notices, participation rights and other contractual protections continue unchanged. The note's defined Fully-Diluted Capitalization includes converting securities on an as-converted basis and applies its own treatment of outstanding and promised options and the unissued option pool, including its limitation on pool increases. The 10,000,000 allocation total is not adopted as that contractual denominator or as a fixed conversion valuation or price.

The Board directs that conversion shares be calculated under the note at the applicable conversion event. Before a conversion or issuance requiring additional authorized shares, the Company must lawfully make sufficient shares available, including any necessary charter amendment and required corporate or investor actions. This consent imposes no obligation on the Founder to make another surrender. It waives no required notice or consent and changes no note term.

5. EFFECTIVENESS DETERMINATION AND RECORDING

Based on the completed founder return, the charter, the foregoing reservation schedule and the approvals in this consent, the Board determines that sufficient authorized and unissued Common shares exist for the amended Plan reserve and the separately reserved EDNA instruments. The existing charter requires no amendment merely to make these reservations of its already authorized Common Stock. No new class, individual grant or conversion is authorized here. Any notice, consent or filing required by an existing financing agreement for these specific reserve actions must have been completed before execution; by signing, the undersigned confirms that determination rather than waiving the requirement.

The Board records the Approval Date as the Plan Amendment Effective Date under Section 3 of the Plan Amendment. The officers shall retain this signed consent, its attached Plan Amendment and the founder-return ledger record together; record the Board adoption, stockholder approval, founder-return completion and Amendment Effective Date; and update the Plan reserve record to 1,600,000. Earlier Plan versions and their signatures remain historical records. Future issuances remain subject to sufficient shares and all applicable approvals and financing obligations.

6. SINGLE SIGNATURE IN SEPARATE CAPACITIES

By the signature below, Tremaine Grant first adopts these resolutions as sole director and then separately approves them as sole stockholder, holding all outstanding voting Common Stock after the founder return. He directs the Company to retain the consent with both its Board and stockholder records. Electronic execution and delivery are authorized; the signature record supplies the actual date.
