

PULSE INTELLIGENCE LABS

THE HUMAN PERFORMANCE COMPANY

Pulse Check is our flagship product, mental performance training software for college athletics.

CEO · Tremain Grant · tre@fitwithpulse.ai

● THE PROBLEM

Pressure gets seen **too late.**

Athlete pressure rises before any support system responds.

CRISIS RISK

4x

more likely to face a mental health crisis.

COMPETITION ANXIETY

60%

of athletes experience anxiety leading up to competition.

COACH VISIBILITY

10%

reach out to a coach before crisis hits.

● THE SOLUTION

Train the mind **before the moment.**

Pulse Check is a software platform used to train the athletes mind at the same rigor we train the body.

TRAIN

Athletes chat with **Nora**, their AI coach, through a personalized curriculum of cognitive simulations on their phone

SUPPORT

Nora identifies **early signs of mental health crisis via chat context and biometric data** through wearable devices

ROUTE

When Nora **detects symptoms of a mental crisis brewing**, Pulse Check **connects the athlete to a human clinician through AuntEDNA.ai's HIPAA-compliant clinical pathway.**

Athletes train the response before competition, so the body remembers how to perform under pressure.

Mental health support is now **required.**

The NCAA mandates that every member school provide student-athlete mental health support. Pulse Check is how schools meet it.

● **2022**

NCAA Constitution requires mental health access for every member school.

● **Aug 2024**

Best Practices became legislatively effective across all divisions.

● **Nov 2025**

First Division I attestation deadline. Compliance is now reported.

THE 4 REQUIRED COMPETENCIES

Healthy environment

Screening for distress

Action plans

Care from licensed providers

Pulse Check delivers all four.

● WHY THIS IS DIFFERENT

Not a vitamin. A **prescription**.

Most performance tools are optional upgrades. Compliance makes Pulse Check a line item schools already have to fund.

THE OLD WAY

A vitamin

- ✗ Nice to have, easy to cut
- ✗ Sold on motivation
- ✗ Competes for discretionary budget

PULSE CHECK

A prescription

- ✓ Required, already in the budget
- ✓ Sold on compliance
- ✓ Funded as a mandate line item

● HOW IT WORKS

What the athlete **actually** sees.

Athletes train mental skills through simulation training via their Android or iPhone device.

Passive biometrics read each athlete in context.

Guided box-breathing trains the body to settle.

In the moment, Nora settles the trained response.

● THE ROUTE

A real human steps in when Nora is unqualified

NORA FLAGS IT

1

Trigger

Conversation and biometric triggers an escalation

2

Route

We route the athlete to our partners AuntEDNA.AI

3

Human

A licensed clinician runs a same-day welfare check

A HUMAN ANSWERS

The difference: chatbot “therapy” stops at the AI. Pulse Check never pretends to be the clinician — it routes to one, with the context already packaged.

One sport-specific system **replaces three apps.**

WHOOP reads the body. Calm teaches skills. BetterHelp offers chat therapy. Pulse Check delivers all three, tuned to each sport, and escalates to humans at the right time.

	WHOOP	Calm	BetterHelp	Pulse Check
Biometric signal	✓	✗	✗	✓
Mental skills training	✗	✓	✗	✓
Licensed human care	✗	✗	✓	✓
Sport-specific by design	✗	✗	✗	✓
Detects, then escalates in time	✗	✗	✗	✓

Technology surfaces the signal. Humans deliver the care. Pulse Check escalates at the right moment.

We start where compliance is **mandatory**.

Every NCAA school is a required buyer. We land schools first, then expand to the pro and federation tiers.

PRIMARY FOCUS · NCAA INSTITUTIONS

1,100+

NCAA member schools

520K+

student-athletes

100%

require mental health support

LATER EXPANSION

Campus-wide licenses

~\$400K per institution

Clinics & sports medicine

Access and network layer

Pro teams & federations

Horizon after NCAA proof

● MARKET SIZE

A \$10.8B market, sized from the bottom up.

Every line is countable buyers times actual pricing. The five-year focus is the \$570M SAM; the beachhead is already contracted.

TAM · BOTTOMS-UP

\$10.8B

Youth athletics · 27M × \$355	\$9.6B
Campus-wide students · 19M × \$50	\$950M
Collegiate · ~1,850 depts × \$75K	\$140M
Sports performance clinics	\$75M
Professional teams	\$40M
Sports medicine practices	\$40M

SAM · 5-YEAR FOCUS

\$570M

Campus-wide · 7.5M NCAA students	\$375M
Collegiate · 1,100 depts × \$75K	\$82.5M
Sports performance clinics	\$75M
Sports medicine practices	\$40M

SOM · BEACHHEAD

\$1.05M

14 contracts · 12–24 months
~250 athletes per department
2-year minimum terms
Every buyer NCAA-mandated

Beachhead: collegiate athletics. Adjacent: campus-wide, clinics, sports medicine. Horizon: youth and pro.

A clear path into every athletic department.

Pilots are paid contracts. Every school follows the same path, from the first sport to the full campus.

90 DAYS

Pilot

We start with one or two sports, integrate with the school's existing systems, and prove adherence.

2+ YEARS

Multi-year contract

After the pilot we negotiate a multi-year contract, with a 2-year minimum.

All SPORTS

Department expansion

We grow sport by sport until every rostered athlete in the department is covered.

Full CAMPUS

The vision

Mental training is a universal skill. Exams, public speaking, interviews: we expand from athletics to the entire student body.

Three approved pilots: Clark Atlanta, Worcester State, and UMES.

Unit Economics

We quote one flat rate across the board and bring funding with us.

FULL PRICE

\$300

per athlete · per year

HOW WE SWEETEN THE DEAL

Brand sponsorships

Sponsors underwrite deployments at the institution and program level.

Federal & association dollars

Grant funding these schools already qualify for expands their capacity to buy.

No program is priced out. When a program's budget is tight, we find the money to deploy the program.

How one price becomes a **department contract**.

The average athletic department fields approximately 250 athletes.

AVERAGE ROSTER

~250

athletes per athletic department

×

FULL PRICE

14 CONTRACTS · 2-YEAR MINIMUMS · 12-24 MONTH BEACHHEAD

\$1.05M ARR

A visible path to **\$100M ARR.**

Prove Pulse Check across the NCAA in Years 1–2, then expand within captured accounts: campus-wide, clinics, and sports medicine.

YEARS 1–2 · PROVE IT

~\$1.05M ARR

Land anchor contracts across the NCAA on 2-year minimums. Validate the product, build case studies, establish compliance credibility.

14 contracts · ~\$2.1M contracted

YEARS 3–5 · SCALE

\$100M+ ARR

NCAA athletic departments · ~1,000 × \$75K ~\$75M

Campus-wide licenses · ~25 schools × \$400K ~\$10M

Sports performance clinics · ~500 × \$15K ~\$8M

Sports medicine practices · ~330 × \$21K ~\$7M

Pro teams & federations · upside beyond +

≈ 18% OF THE \$570M SAM

\$100M+

● PROOF IN MOTION

Five pilots, on real campuses.

NAKYALA · CLARK ATLANTA

5 approved pilots — **Clark Atlanta, Worcester State, University of Maryland Eastern Shore, HyperCharge Performance Clinic, 4D Cycling Club.**

5

approved paid pilots

Why it matters. Five approved pilots will help prove the product, compliance, and commercial strategy.

● THE TEAM

Operators who know **software, athletes, and clinical trust.**

Tremaine Grant

FOUNDER & CEO

Principal full-stack engineer, deep in AI, with a decade in clinical research. D1 athlete at FSU.

Bobby Nweke

CHIEF OF STAFF

10 years in human performance across training, athletics, and education.

Lola Oluwaladun

HEAD OF DESIGN

Owns product experience and athlete-facing UX across Pulse.
